This course is aimed at foreign care workers who work in care in Germany and want to train their language skills in this way. During the 10 seminar days, comprehensive care situations are combined with communication situations.

In this language course for caregivers, different care situations are dealt with, and the corresponding communication is practised. The following care situations are covered, for example:

- Admission to hospital / old people's home
- Wound care
- Patients with specific illnesses
- Hygiene
- Body care

GOALS

- Training in communication based on selected situations
- Promotes communication with colleagues, patients, residents and relatives
